## **REACH-regulations 1907/2006**

Dear Customer,

**REACH**, the new EU chemical regulation, **R**egistration, **E**valuation and **A**uthorisation of **C**hemicals requires that chemical substances on their own, in preparations and those articles which intentionally release substances, if the annual amount is one tonne or more have to be pre-registered to the European Chemicals Agency (ECHA). The regulation applies to all manufacturers and importers to the EU as a first step.

RSD Technik, as an user and distributor of these chemical substances are not obliged to pre-register, besides we would import these chemicals from non-EU suppliers. All substances used for the manufacturing of printing ink and solvent are exclusively from EU suppliers.

We are in close contact with our suppliers and check their pre-registration activities with their responsible departments to assure that only pre-registered and registered substances are used for the production of our printing inks.

Our objective is to provide you with the right information at the right time.

We are looking forward to working successfully together with your company.

Best regards  
RSD Technik GmbH
