

Cableprint CP 1Z

The cableprinter CP 1Z is a printing machine working by traction and using the direct gravure method. This machine is particularly adapted to the printing of cables, hoses, tubes, and fully complies with CE norms.

Standard version

- 1 printing head for concave or plain wheel Ø 86,0 mm
- 1 shaft for mounting hole Ø 12,7 mm
- 1 scraper bracket with scraper
- 1 counter roller
- 1 guiding system
- 1 ink spraying system with by-pass valve
- 1 ink pump with cooling system and reservoir for to 2 kg
- 1 solid stand with adjustable height from 900 to 1200 mm
- 1 tool set

Technical Data

- Printing area from 0,8 up to 25,0 mm
- Printing speed results from traction
- Power supply: 400V, 50 Hz, 3-phase
- Machine weight: about 40 kg
- Ink pump weight: about 23 kg
- Dimensions: width 400 mm, depth 400 mm

Location

The ideal location is between the first and the second cooling trough. Other locations are possible, but subjected to testing. Precondition for quality printing is a clean and dry cable surface.

One-stop shopping

From printing wheels and machines, corona treatment, viscosity control systems, inks, special solvents and special cleaners to custom-built machines – **RSD Technik** offers solutions to meet all your needs.

We reserve the right for technical improvements
