

Cableprint CP 2H

Lateral dual head-printing machine

The cableprint CP 2H is a special dual head-printing machine working by traction with motorised assistance and synchronisation, using the direct gravure method. The two printing stations allow a simultaneous lateral printing of the cable, or only on one of these sides, if required. This machine is particularly adapted to the printing of hoses and tubes. The CP 2H fully complies with CE norms.

Standard version

- 2 Printing heads for wheels Ø 86,0 mm
- 2 Shafts for mounting hole Ø 12,7 mm
- 2 Scraper brackets with scrapers
- 2 Ink troughs with ink spraying units and by-pass valves
- 2 Ink pumps with cooling system and reservoir for to 2 kg
- 1 Guiding system for cables
- 1 Solid stand with adjustable height from 900 to 1200 mm
- 1 Tool set

Technical Data

- Printing area from 0,8 up to 100 mm
- Printing speed up to 500 m/min
- Power supply: 400V, 50 Hz, 3-phase
- Machine total weight: about 110 kg
- Ink pump unit weight: about 23 kg

Location

Different locations possible, but subject to testing. Precondition for quality printing is a clean and dry cable surface.

One-stop shopping

From printing wheels and machines, corona treatment, viscosity control systems, inks, special solvents and special cleaners to custom-built machines – **RSD Technik** offers solutions to meet all your needs.

We reserve the right for technical improvements
